

# Atrax Driver Control Kiosk

## Engineered for Uncompromising Reliability

**ATRAX**

A rugged, purpose-built terminal for unattended weighbridge and access control operations in the world's toughest industrial environments.

# A New Standard in Performance and Durability

The Atrax Driver Control Kiosk is the result of a 10-year journey of continuous evolution and refinement.

Purpose-built for harsh, outdoor, self-service environments, it is engineered to deliver maximum uptime and a low total cost of ownership.

Our Kiosk is a user-friendly, professionally designed and manufactured solution that offers superior performance, build quality, and long-term value, giving you the confidence to run your operations smoothly and efficiently.

Every Atrax Kiosk is built with a core set of features designed to provide exceptional performance and longevity.

### Maximum Durability & Asset Protection

Built with a heavy-duty internal stainless steel chassis and an external aluminium extrusion shell, the Atrax Kiosk resists corrosion, withstands physical impacts, and dissipates heat, ensuring a long service life.

### Superior Reliability in Dusty Environments

By eliminating cooling fans and filters, we've removed a primary point of failure common in competitor products. This design prevents dust ingress and overheating, ensuring your system keeps running without interruption.

### Effortless Driver Interaction

The high-brightness, wide-angle screen is perfectly readable even in sunlight. It is protected by a custom-machined aluminium frame, ensuring both durability and a clear, user-friendly interface for drivers in any weather condition.

### Engineered for Maximum Uptime

The Atrax Kiosk is shielded with multiple layers of transient and spike suppressors on the mains power, Ethernet, and serial connections, protecting sensitive electronics from damage.

### Simplified Installation & Maintenance

Technicians value equipment that is easy to work on. With features like lifting eyes for installation, a lockable, easy-access front door, and clearly labelled internal components, maintenance is fast and straightforward, reducing downtime and service costs.

Configure the Atrax Driver Control Kiosk to meet your exact operational needs with a range of factory-installed options and external peripherals.

### Built-in Options

Configured on Assembly

Enhance the functionality of your Kiosk with these integrated modules:

- Intercom
- EFTPOS Payment Terminal
- Fisheye Security Camera
- RFID Card Reader
- QR Code Reader
- Dallas Tag Reader

### External Peripherals & System Integration

The Kiosk acts as a central hub, capable of controlling a wide array of external devices to fully automate your site:

#### Matching Printer Kiosk

For reliable, hassle-free ticketing in a separate, equally robust enclosure.

#### Slave Kiosk Configuration

Add a second, non-computerised "slave" Kiosk for facilities that require access at both truck and car heights.

#### Full Site Control

Seamlessly manage peripherals including:

- ANPR Cameras (Licence Plate Recognition)
- Traffic Lights & Large Figure Displays (LFDs)
- Barrier Arms & Automatic Gates
- Remote Image Capture Cameras

# Ideal for Any Unattended Weighing Application

The Atrax Driver Control Kiosk is the proven solution for any industry that relies on efficient and reliable vehicle processing over a weighbridge or at a site access point.

## Quarries & Aggregates

Managing high volumes of trucks in dusty, rugged conditions.

## Waste Management & Refuse Stations

Ensuring accurate and efficient processing for both commercial and public users.

## Scrap Metal & Recycling

Thriving in high-traffic, heavy-duty environments where durability is paramount.

## Mining Operations

Withstanding the extreme conditions of mine sites while maintaining operational reliability.

## Agriculture & Forestry

Streamlining the weighing of produce, grain, and timber at remote or unmanned locations.

## Ports & Logistics Hubs

Controlling access and managing container weighing with precision and security.

## Construction & Demolition

Accurately tracking materials and waste moving in and out of large project sites.

## Maximise your operational uptime

Contact us today to discuss how the Atrax Driver Control Kiosk can transform your facility.
